📌 Registration for Spring 2022 Registration for Spring 2022 is now open. Please contact the program advisor to get enrolled. (<https://www.ppcc.edu/degrees-certificates/architecture/contact-architecture>)

Why choose Architecture at PPCC?

PPCC's Architecture Program can provide you with the technical training and preparation to participate as a valuable contributor in architectural, engineering, and construction firms. If the technical training is complemented with marketing skills, you could engage in the world of

construction product sales. In order to prepare you for wide-ranging career options, the program has a three-part emphasis: architectural engineer, construction management, and product representative.

What do PPCC Architecture students study?

This program prepares students to be technical assistants in architectural and engineering firms or careers assisting contractors, manufacturers, and other professionals connected with the building industry.

All students should schedule appointments with Architecture program advisors before enrolling in class.

Classes you might take

Residential Construction Drawing	AEC 102	>
Architectural Drawing Theory	AEC 104	>
Print Reading Residential / Commercial	AEC 107	>

Career Options

AAS degree graduates in Architecture may find rewarding careers with companies and organizations providing architectural engineering services. Some job opportunities may include:

- Architectural Technician
- Architectural Drafter
- Urban or City Planner
- Cost or Construction Job Estimator
- Construction Project Manager

Program Learning Outcomes

Program Learning Outcomes (PLO) are competencies with which students will be proficient at the completion of an academic program. Program Learning Outcomes link with course learning outcomes and competencies.
