

Biography of Prof. Stefan Erickson

Prof. Erickson has had a lifelong love of mathematics, number theory, and secret codes. After receiving his bachelor's degree from Rice University and doctorate degree from UC San Diego, he has been teaching at Colorado College for the past twenty years. Prof. Erickson's areas of research interest lie in algebraic number theory, computational number theory, and applications to cryptography. He has taught twenty-five different courses over the years, including Freedom and Authority, The World of Numbers, and The Mathematics of Poker. In his spare time, he enjoys Zen meditation, yoga, gardening, and travel.
